PROJECTS

Vibe Verse : Social Media Website
Built the web site for the purpose of social networking . Used HTML , CSS , JavaScript,Bootstrap and ReactJS in the front-end part. Designed the backend using MongoDB , Node.js and express.js

Diamond Price Prediction
Utilized historical data. Analyzed the market price by considering attributes like carat weight, cut, clarity, and color. This data-driven approach empowers traders, retailers, and consumers in the diamond market.

Stock Price Analysis using EDA
Through visualization and statistical techniques, key insights are derived to aid investors in decision making. EDA serves as a fundamental tool for understanding market behavior and forecasting future trends.

Time Series Analysis of AQI
Analyzed the presence of different harmful gases present in the air that deteriorates the AQI of the city Delhi and predicted the AQI of next 90 days and compared that with the pre-existing models such as ARMA , ARIMA , SARIMA , ARIMAX .

CERTIFICATIONS

- Microsoft Azure (AZ-900)

- Accenture Data Analytics and Visualization
